

# WHERE DO STUDENTS get their money from?

The OECD Programme for International Student Assessment (PISA) in 2015 examined 15-year-old students' financial literacy skills. This infographic compares the main sources of income for students from Australia with the average from the participating OECD countries.

## Percentage of students who get money from...

Pocket money for regularly doing chores at home

Pocket money without having to do any chores

Working outside school hours (eg part-time work)

Working in a family business

Occasional informal job (eg baby sitting)

Gifts of money from friends or relatives

Key: Australian students OECD average
