THE SCHOOLS OF THE FUTURE

The 2030 School Survey engaged members of the World Innovation Summit for Education (WISE) community to gain perspective on what schools will look like in 2030.

- 75% of respondents think that personal skills will be fundamental.
- 73% of experts think the role of teachers will shift to guiding students towards their own learning path.
- 83% of experts think pedagogical content will shift to more tailored, personalised content.
- 65% of experts think the language used in education will no longer be national, but rather global, or regional.
- 42% of respondents think academic knowledge will be fundamental.
- 43% of respondents ranked online content as the most important source of knowledge.
- 90% of experts think continuing with education throughout a professional life will become the norm.
