Longitudinal Surveys of Australian Youth

Longitudinal Surveys of Australian Youth is a program of surveys of young people jointly managed by ACER and the Commonwealth Department of Education, Training and Youth Affairs. The surveys focus on the education and labour market experiences of groups of young Australians, beginning from their middle years of secondary schooling. Data collected include basic demographic variables, as well as information about educational and labour force participation extending over a number of years.

The school and teacher survey

Students participating in this LSAY cohort were originally sampled in 1998 from 296 schools nationally. In 1999, the schools from which the original sample of students was drawn took part in a survey to collect information about the features and programs of schools, as well as features of teachers and teaching, which might influence the progress of students in their school and in their later work careers.

The survey involved two questionnaires: (1) a school questionnaire to be completed by the principal (or other school representative) and (2) a questionnaire to a sample of ten Year 10 teachers. The assistance of the LSAY Reference Group in developing the questionnaires is gratefully acknowledged. The school questionnaire collected information on school programs, organisation and timetables. The teacher survey included questions on aspects of teaching and learning. The codebook for the Teacher survey is provided in Technical Report No. 20. The codebook and responses for the school survey are provided in this technical paper.

SCHOOL AND TEACHER SAMPLES

The national sample of schools for this cohort was derived in 1998. The sample design provided a sample of 296 schools and 13, 975 Year 9 students. The major stratum considered in the design was the State and Territory organisation of schools. Schools and students from smaller States were over-sampled and, correspondingly, schools and students from larger States were under-sampled. Selection of schools and students within states was proportional by sector. Three sectors were used as strata: government schools; Catholic schools; and non-government, non-Catholic schools. Within strata, schools were selected proportional to their enrolment size, with an implicit stratification by geography because of the postcode-order of the sampling frame.

The teacher survey was conducted with the assistance of schools. School contacts for the survey were asked to select ten Year 10 teachers to complete the teacher questionnaire, with at least one teacher from each of eight Key Learning Areas: mathematics, science, studies of society and environment, technology, English, health sciences and physical education, creative and performing arts, and languages other than English.

Dimensions of data set

Number of schools: 218 (unweighted)

Number of variables: 104

Method of data collection:

Questionnaires mailed out to schools

Data gathering staff

ACER staff: John Ainley, Nicole Fleming, Sue Fullarton, Stephen Lamb, Mike Long, Phil McKenzie, Julie McMillan, Gary Marks, Julie Zubrinich

LSAY Steering Committee: The LSAY program operates under the direction of a Steering Committee, which sets overall policy and approves the analytical program. The Committee has 10 members representing national authorities concerned with education, training, and employment in Australia.

LSAY Reference Group: The Reference Group, which comprises representatives from DETYA and DEWRSB, advises ACER on priorities in the analytical program and survey development.

Longitudinal Surveys of Australian Youth

School Questionnaire

In 1998 a number of Year 9 students at your school took part in the Longitudinal Survey of Australian Youth. The main aim of the study was to collect information that can be used for the on-going monitoring of participation in school, training and the labour market. The study is conducted by the Australian Council for Educational Research.

To help improve our understanding of the school experiences of students we are seeking information from your school on organisation and programs. All responses to this questionnaire are strictly confidential and no individual school, teacher or student will be identified.

Please answer the questions by either ticking the most appropriate box or by writing in the space provided. If your school is a multi-campus school, please treat the entire school as a single unit. Please answer ALL questions. Should you want to comment further on any questions, please attach an extra sheet.
