

Students arriving late for school

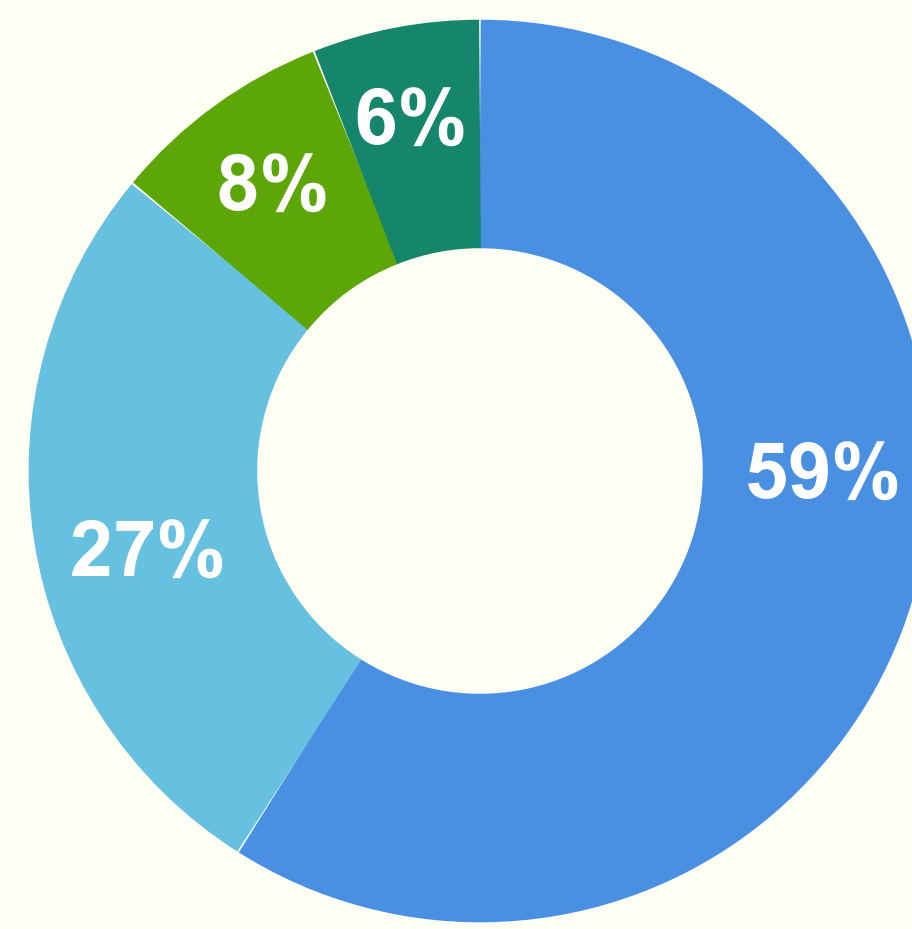

late for school

The OECD has collected data* on student lateness. Students were asked how many times in the two weeks prior to the PISA 2015 test they had arrived late for school. Here are some of the results.

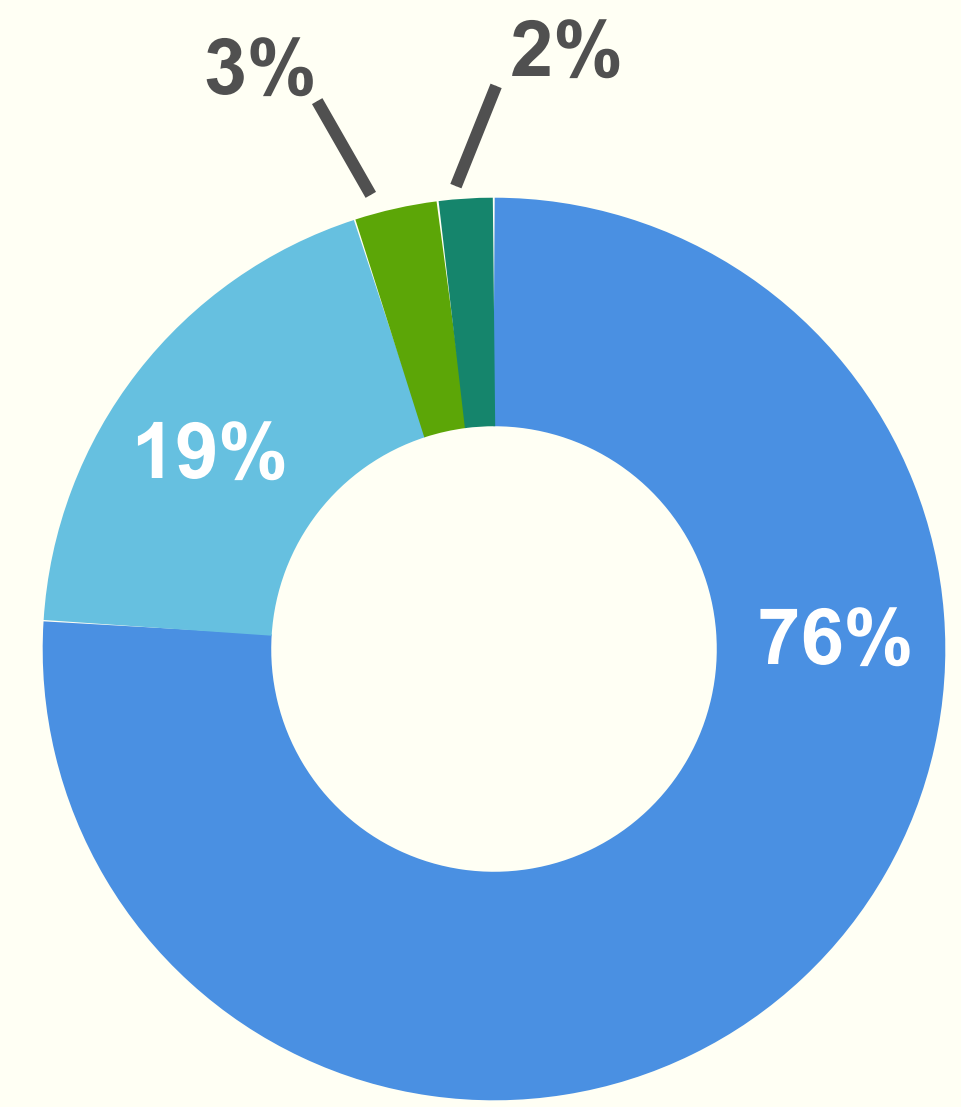

Key ■ Never ■ Once or twice ■ Three or four times ■ Five or more times

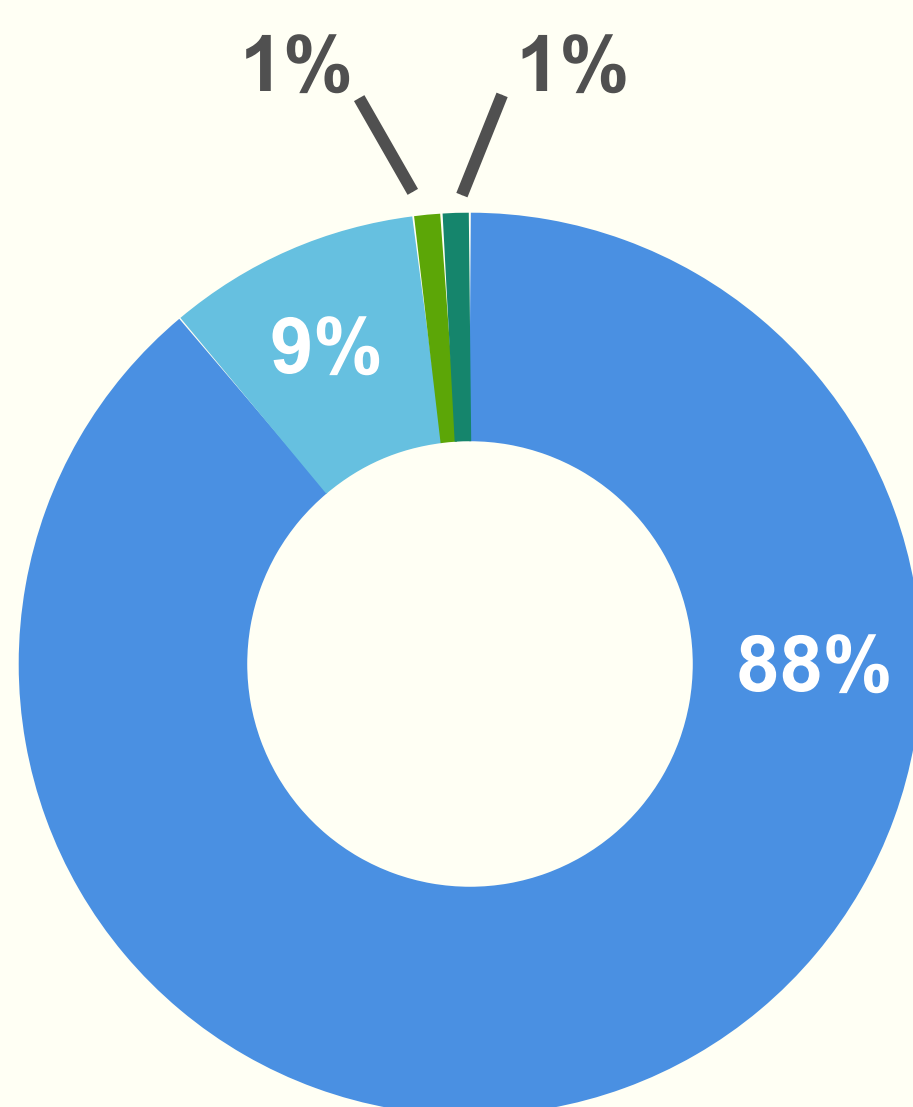

OECD average

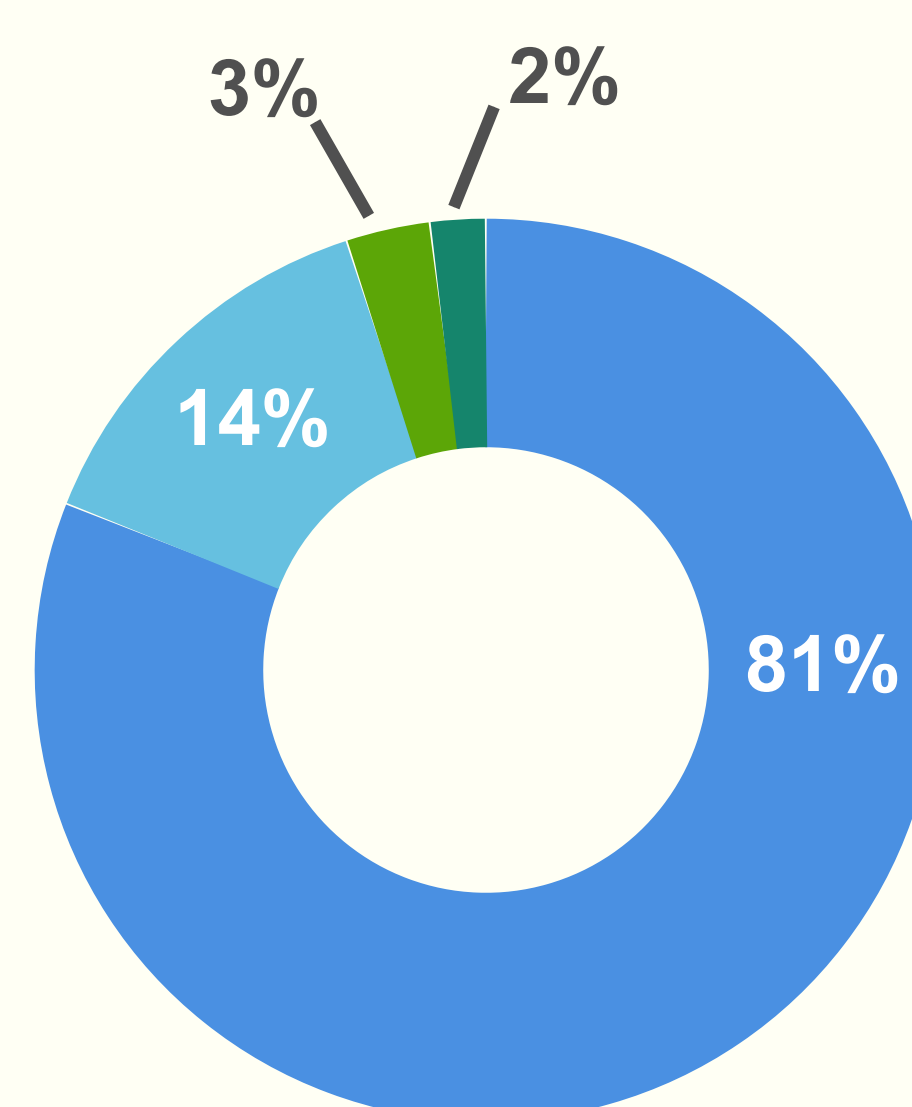

Australia

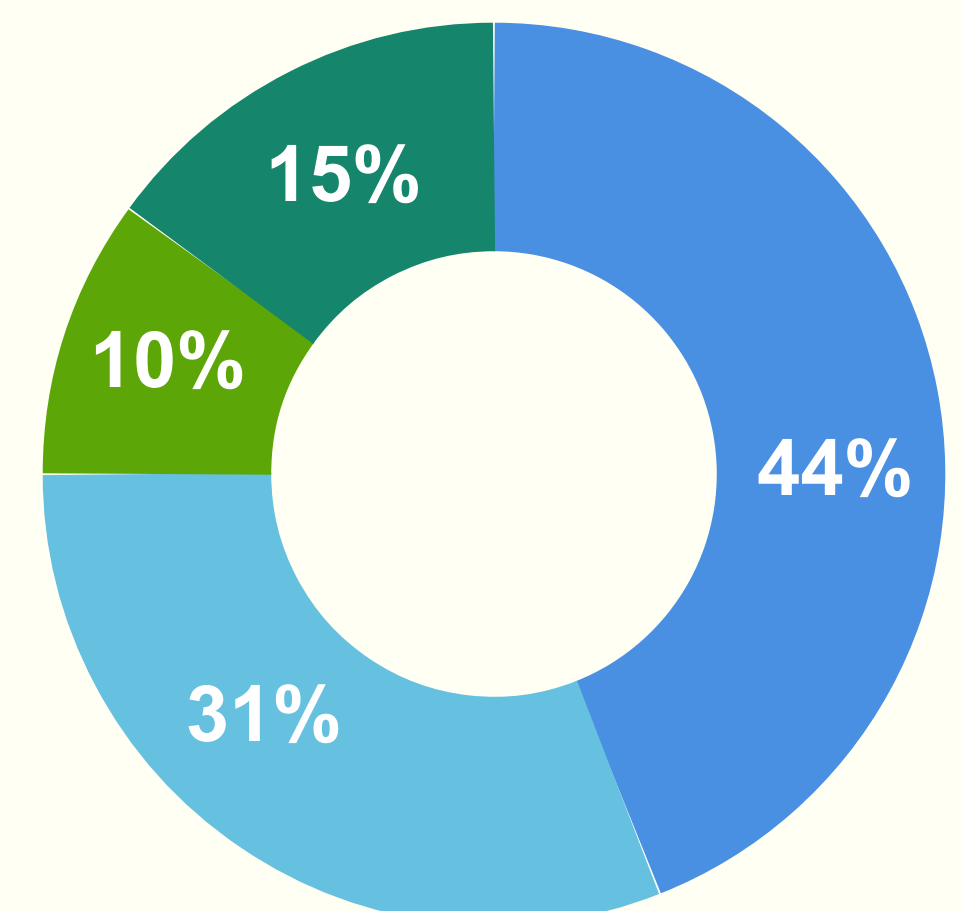

Hong Kong (China)

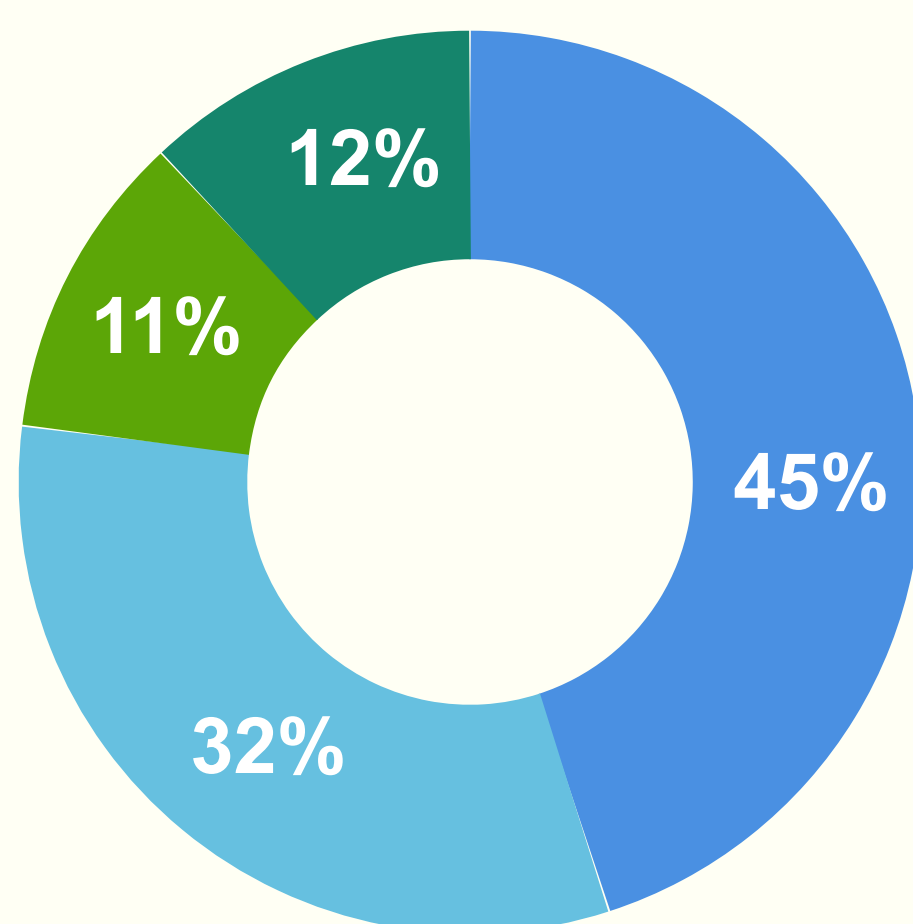

Japan **

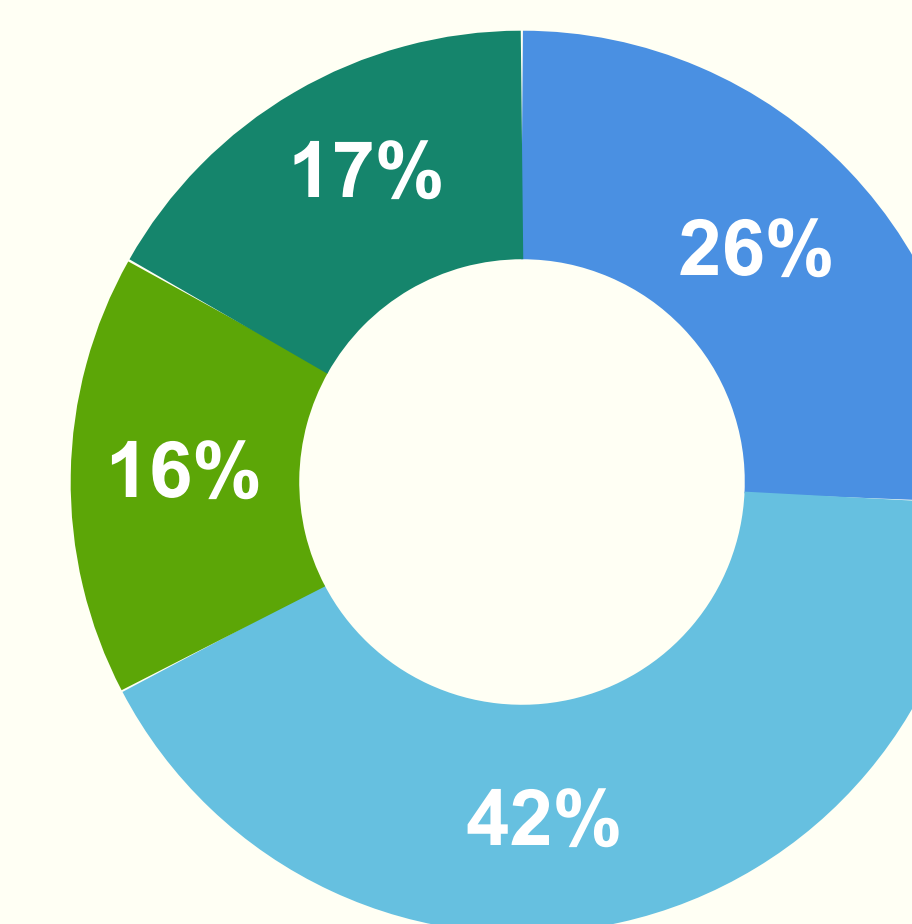

Korea

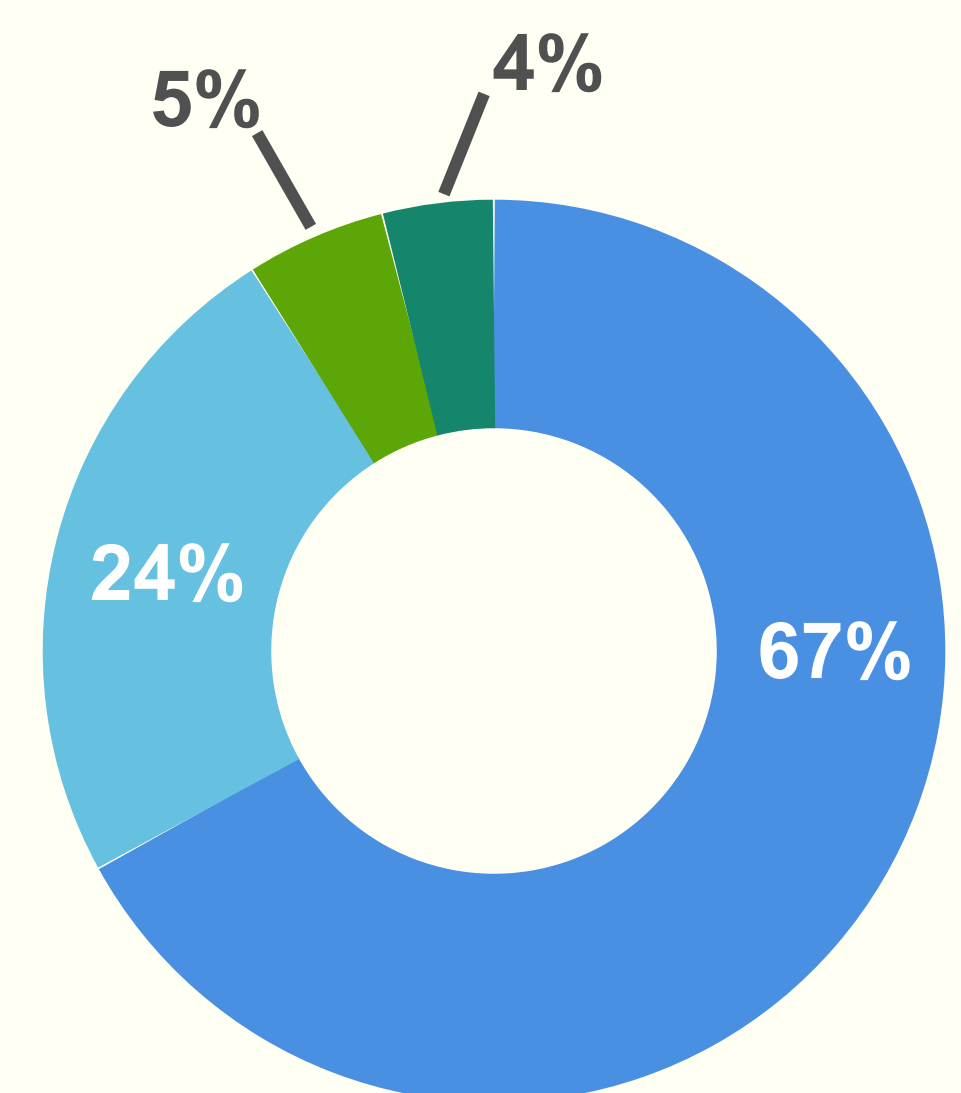

Poland

Russia

Tunisia ***

United Kingdom

* Results based on students' self-reports

** Lowest percentage for 'five or more times' and highest percentage for 'never' reported of all countries and economies

*** Highest percentage for 'five or more times' and lowest percentage for 'never' reported of all countries and economies
