

# The National Student Assessment 2022 in Bangladesh: Key Findings & Learnings

The NSA 2022 is a sample-based assessment in Bangladesh, covering 3,357,233 students in grade 3 and 3,604,586 students in grade 5.

## Sampling method

**School level** - multistage stratified probability proportional to size method

**Student level** - equal probability systematic random sampling

NSA 2022 sampling frame was derived from Annual Primary School Census (APSC) 2021 database.

## Summary of the sample drawn for NSA 2022

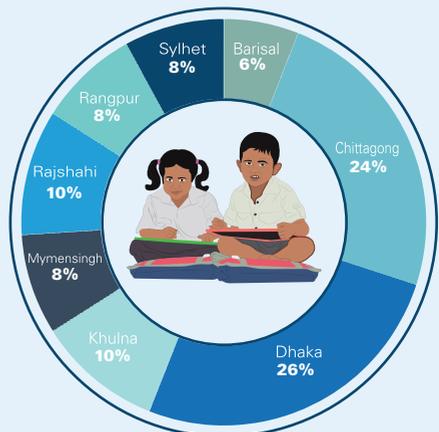

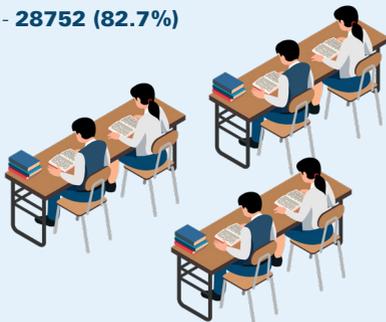

\* For the purpose of reporting some school types were merged and reporting done for 7 school types.

## Division level participation of students

Overall respondents and participation rate were

Grade 5 - **25480 (90.1%)**

Grade 3 - **28752 (82.7%)**

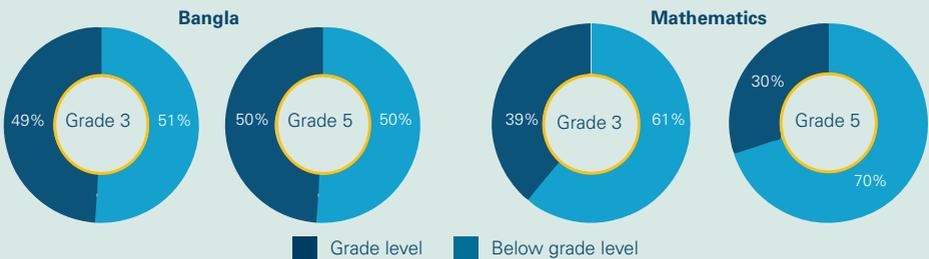

# Findings

Performance in NSA 2022 is similar or slightly better as compared to NSA 2017, but lower when compared to NSA 2013.

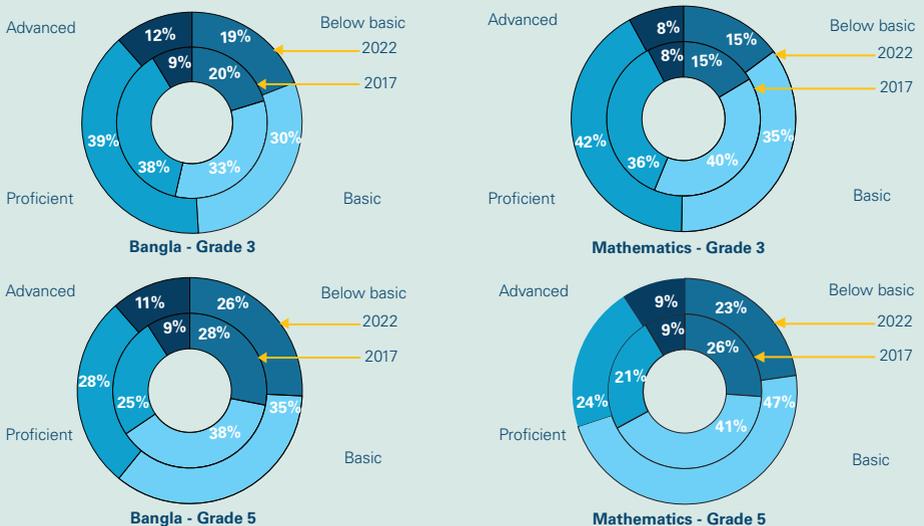

Still only half of the students in Bangla, and a third in Mathematics are at grade-level competencies.

Percentage performance at grade level competencies

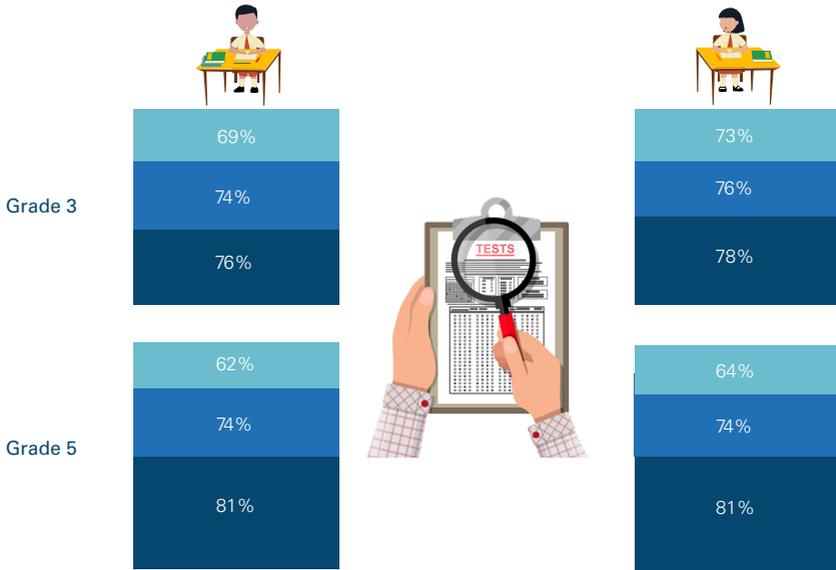

Comparison between students at each performance level in Mathematics and Bangla in 2017 and 2022.

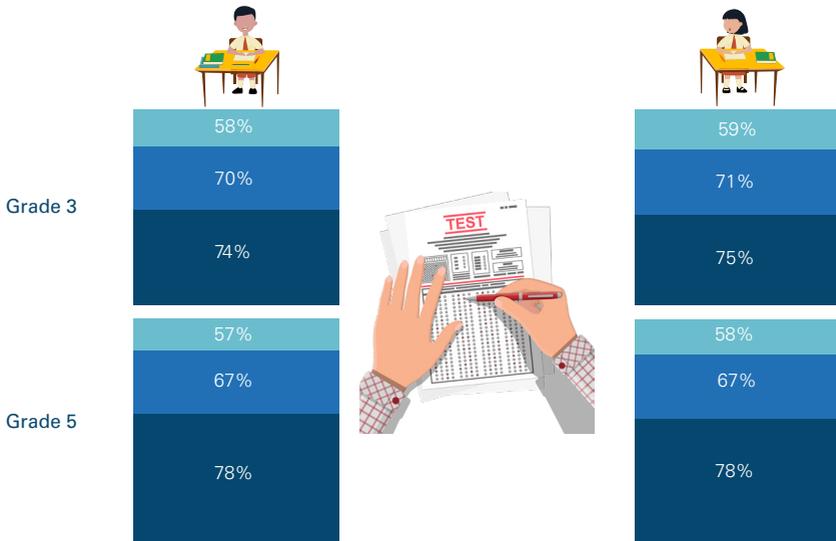

## Students performed considerably lower on tasks assessing application and higher order skills.

Performance in Bangla by cognitive level in grades 3 and 5

Knowledge
  Understanding
  Application and higher order thinking skills

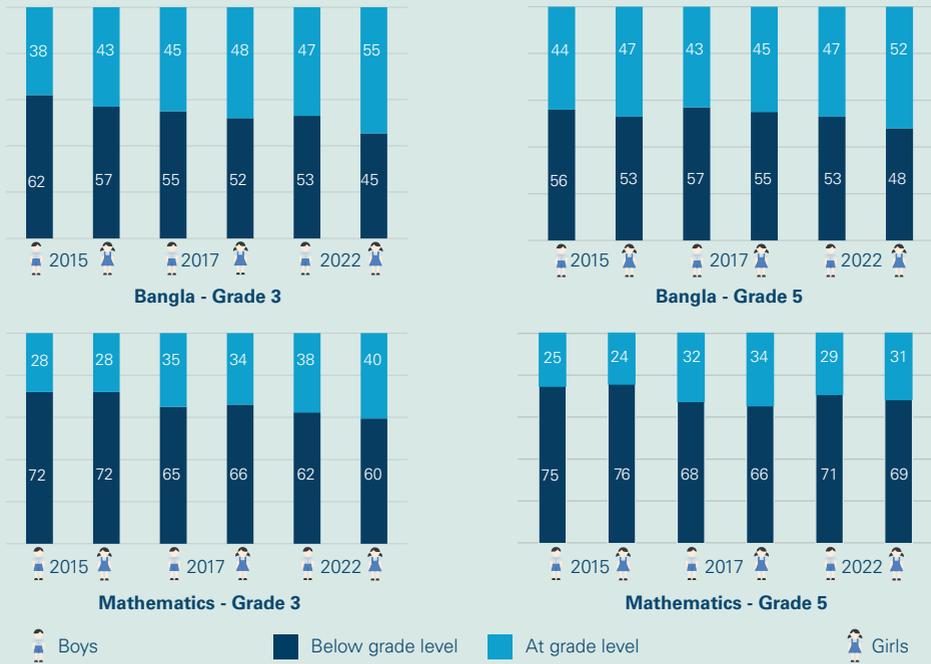

Performance in Mathematics by cognitive level in grades 3 and 5

**Persistent learning gaps exist among regions, school types, and geographic locations. In terms of gender, the performance of boys and girls was almost similar.**

NSA 2022 performance by Gender in achieving grade-level competencies

**Significant variations are observed in terms of school types, with Government Primary school performed better than the national average, whereas Madrasah performed significantly below the National level.**

Mean scores by school type in NSA 2022 for grades 3 and 5

	Mathematics				Bangla			
	Mean	Std. Dev	Mean	Std. Dev	Mean	Std. Dev	Mean	Std. Dev
GPS	105	13.9	115	12.4	104	13.6	111	11.7
NNPS	103	12.7	112	11.5	102	13	109	11.5
KG	103	12.9	113	11.1	104	11.3	112	11.3
HSAPS	103	12.2	113	11.2	105	12.2	113	11.9
Madrasah	99	14.4	108	11.6	100	13.2	105	12.1
NGO	99	15.4	106	11.7	99	14.4	106	14.1
SKPS	100	10	115	6.9	106	13.9	109	10
<b>National Mean</b>	<b>104</b>		<b>113</b>		<b>103</b>		<b>110</b>	

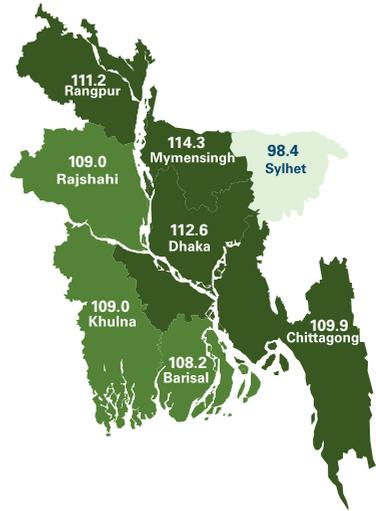

\* Government Primary School (GPS); Kindergarten (KG); High School Attached Primary School (HSAPS); Sishu Kollyan Primary School (SKPS); Newly Nationalised Government Primary School (NNGPS)

**Dhaka and Mymensingh Divisions seem to have performed better than other Divisions while Sylhet is underperforming, as in the case of previous rounds of NSA.**

# Factors associated with learning

Enablers that showed positive association with students' performance in NSA 2022

## Head teacher

- Supportive supervision to both teachers and students
- Constructive feedback provided to teachers
- Teacher professional development activities
- Regular monitoring of teacher & student performance

- Teacher's pedagogic knowledge and ability
- Teacher - student interaction
- Group work and activities
- Encouraging student to speak their mind
- Understanding of the purpose of assessment
- Motivation and job satisfaction

## Assistant teacher

## School

- Physical facilities like access to clean toilet and drinking water, library, and playground
- Availability of and access to TLM
- Safe school environment
- Positive perception of school

- Parent's education and stability of job
- Parent's engagement in learning and participation in school activities
- Availability of resources at home (e.g., story books)
- Reading texts other than textbooks

## Home environment

Inhibitors that adversely affect the performances of students

Class repetition

Teachers' vacancy at school

Student taking private tuition

Unsafe school & home environment

Poor student teacher interaction

Poor access to learning opportunities during COVID-19

# Recommendations

## Learning and equity

- A separate study may be conducted to assess the **impact of school dropouts** if any on National Mean Performance.
- **Reading-focused framework like PISA** may be developed for future cycles to enable sub-skills assessment.
- Appropriate **professional development programs** may be designed for teachers to link school learning with real-life experiences for students.
- A **systematic policy research** followed by an **evidence-based action plan** is recommended for narrowing achievement gaps.
- One size may not fit all, therefore targeted, and **differentiated policy measures and interventions** may be adopted to improve performance in Madrasah and low-performing geo locations and divisions like Sylhet.
- **Capacity building programmes** to targeting practices to improve student-teacher interaction, creating safe environment in school, enhance pedagogical knowledge and skills to promote learning among students to achieve grade level competencies.
- Leadership programmes may **prioritize academic supervision by head teachers** to create an **enabling environment promoting learning**.

## Project management of NSA

- A system may be put in place for **storing and maintaining essential NSA documents** and data files.
- Next cycles may consider at least **8 months long design phase** to ensure review of curriculum, updating the assessment framework, quality of assessment items as well as piloting items.
- **Strengthening of officials' capacity** in different aspects of large-scale assessments shall ensure quality evidence informing policy.
- A strong **collaboration and coordination between different line division of Directorate of Primary Education (DPE)** may be helpful to get error-free sampling frames, representative samples and evidence driven policy and initiatives.
