

EDITORIAL

It came, it launched, it crashed – and relaunched, crashed, got tweaked a bit and relaunched, but didn't quite conquer. The My School website, managed by the Australian Curriculum, Assessment and Reporting Authority, was quite the centre of attention in January. Commenting in favour, Australian Council for Educational Research Chief Executive Geoff Masters pointed out that My School's reporting of actual student test results, by school and by comparison with like schools, provided real transparency, but conceded that media outlets could use the data to create school league tables. Against, Australian Education Union Federal President Angelo Gavrielatos criticised the naming and shaming of schools, calling My School's like-school comparisons 'invalid.' Writing in the *Melbourne Age*, John Marsden, award-winning author and principal of the Candlebark School north of Melbourne, described the My School website as 'morally indefensible,' but pointed out that you can find out what a school is really like by visiting it and talking with students. 'The other way of evaluating the real worth of a school is to gain access to...the kids' toilets and the staff room,' he noted. 'The quality of the lavatory facilities is the single best indicator of the respect in which children are held in a school.' **T**

IN MEMORIAM

The oldest fully-registered teacher in Victoria, Br Francis McCarthy, died at the age of 90 years in January. He began teaching in 1940, when he was 19 years old, and was still inspiring, guiding and challenging students in July last year at St Kevin's College, Melbourne, where he taught for 33 years. He was principal of Christian Brothers' College, St Kilda, and Parade College, Melbourne. **T**

FAST FACTS

- 'The Americans have need of the telephone, but we do not. We have plenty of messenger boys.' Sir William Preece, British Post Office, 1878.
- 'Who the hell wants to hear actors talk?' HM Warner, Warner Bros, 1927.
- 'I think there is a world market for maybe five computers.' Thomas Watson, chairman of IBM, 1943.
- 'Television won't be able to hold on to any market it captures after the first six months.' Darryl Zanuck, 20th Century Fox, 1946.
- 'The world potential market for copying machines is 5,000 at most.' IBM heads to the eventual founders of Xerox, 1959.
- 'There is no reason anyone would want a computer in their home.' Ken Olsen, Digital Equipment Corp, 1977.
- 'No one will need more than 637 KB of memory for a personal computer – 640 KB ought to be enough for anybody.' Bill Gates, Microsoft, 1981.
- 'Next Christmas the iPod will be dead.' Alan Sugar, British entrepreneur, 2005.

8. Racism in Australian schools is declining. True or false?
9. Is a student who receives help from his or her parents guilty of cheating?
10. What does Steve Holden suggest you call the students of the next generation heading to the door of your classroom?

ADVERTISER OF THE MONTH

Smart Food, Healthy Body

This Australian-made, primary curriculum fit program takes us outside to an athletics track and inside to a battle of minds over a chessboard - exploring how nutrition plays a critical role in maintaining both a healthy body and mind. Our presenter, aided by young competitors, guides us through the role that nutrients play in our diets and the positive outcomes that can be achieved by making healthy and balanced food choices. We finish by taking a look at the journey food takes through our body showing how nutrients are taken in and waste products removed.
