

Most popular sports for children over time

What sports does your school offer? Is there an overlap with the sports and activities students participate in outside school? Since 2015, Sport Australia has conducted AusPlay, a large scale national survey tracking involvement in sport across the population, on an annual basis. In this infographic we compare the data on the top 10 sports (by participation rate in %) for girls and boys aged 0-14 to see how habits have changed over a 5-year period.
