

Girls' interest in studying engineering

It's well-known that women are underrepresented in participation in Science, Technology, Mathematics and Engineering (STEM) education and the STEM workforce. The 2021 Youth in STEM study surveyed participants* about their awareness and perception of STEM subjects and careers. As this infographic shows, the findings reveal age is important for girls when it comes to interest in studying engineering.

*3,154 young people aged between 12 and 25 years

12-13 years old: 46%

14-17 years old: 33%

18-21 years old: 26%
