

# Wise words on teacher workload

In our annual reader survey, we ask you to share a piece of advice with a fellow educator. Here are some of the responses we received on the topic of managing workload as a teacher.

'Don't take it all on. **Share** the load.'

'Build a team around you to share ideas, evaluate each other's task construction, moderate etcetera. **You can't do it on your own.**'

'Ensure you are **rested**'

'Do the **best you can** and do not dwell on things you cannot change.'

'Perfection can be a problem for teachers because the work is never ending and honing lessons can be never ending. **Strive for the best within the time you have.**'

**Teacher**
