## *Longitudinal Surveys of Australian Youth*

*Longitudinal Surveys of Australian Youth* is a program of surveys of young people jointly managed by ACER and the Commonwealth Department of Education, Science and Training (DEST). The surveys focus on the education and labour market experiences of groups of young Australians, beginning from their middle years of secondary schooling. Data collected include basic demographic variables, as well as information about educational and labour force participation and experiences extending over a number of years.

The present form of the LSAY program commenced in 1995 with a national sample of Year 9 students. The program also brings together earlier longitudinal studies conducted by ACER under the Youth in Transition (YIT) program, and by the Commonwealth under the Australian Longitudinal Survey (ALS) and Australian Youth Survey (AYS) programs. The data collected through LSAY are deposited with the Social Science Data Archives (SSDA) for use by other researchers.

### **The 1998 Year 9 Cohort (Y98)**

In 1998, a nationally representative sample of approximately 14,000 Year 9 students was selected to form the second cohort of the Longitudinal Surveys of Australian Youth. The sample was constructed by randomly selecting two Year 9 classes from a sample of schools designed to represent state and sector. Reading and numeracy tests were administered to students in their schools to provide information on early school achievement for use in later analyses of educational and labour market participation. Students also completed a background questionnaire about their educational and vocational plans and attitudes to school.

Details on the 1998 survey are provided in LSAY Technical Report No. 19. In 1999 sample members were administered a brief mail survey sent to their home addresses. Details on the 1999 (Wave 2) survey are included in LSAY Technical Report No. 22, and the 2000 (Wave 3) survey in LSAY Technical Report No. 24.

### **The 2002 Y98 Telephone Survey**

The 2002 Y98 Telephone Survey was conducted with the 8,777 students who formed the 2001 sample. Of that group, 7,762 useable interviews were completed successfully (88% of the active sample). There were 441 refusals or terminations of interview (5% of the active sample). The modal age of the sample in 2001 was 18 years.

This was the third year of telephone interviewing for this cohort. The survey instrument collects data on their educational and labour market experiences, as well as housing, family and financial issues. The survey involves around 25 minutes of telephone interview time.

**Dimensions of data set**

Number of respondents: 7762

Number of variables: 468
