

EDITORIAL

The National Curriculum Board is expected to deliver English, Mathematics, Science and History curricula by 2010, with a full national curriculum by January 2011, but what kind of national curriculum will it be? Quoted in the *Australian* last month, Chair Barry McGaw said particular curriculum statements will direct both pedagogy and content. The firm emphasis in comments by Deputy Prime Minister and Minister for Education Julia Gillard have insisted on Commonwealth-state cooperation, and that's what the board's representative membership would seem to promise. Members include: Deputy Chair Tony Mackay, Executive Director of the Centre for Strategic Education; Tom Alegounarias, Chief Executive Officer of the New South Wales Institute of Teachers; John Firth, Chief Executive Officer of the Victorian Curriculum and Assessment Authority; Kim Bannikoff, Director of the Queensland Studies Authority; Bill Loudon, Dean of Education at the University of Western Australia; Helen Wildash, Executive Director of Curriculum Services at South Australia's Department of Education and Children's Services; David Hanlon, Deputy Secretary in the Tasmanian Department of Education; Rita Henry, Executive Director of the Northern Territory Department of Employment, Education and Training; Janet Davy, Deputy Chief Executive of the Australian Capital Territory Department of Education and Training; Garry Le Duff, Executive Director of the Association of Independent Schools of South Australia; Brian Croke, Executive Director of the Catholic Education Commission of NSW; and Marie Emmitt, Dean of Education at the Australian Catholic University. Whether they simply weld together a coordinated curriculum or actually forge a national curriculum remains to be seen. **T**

ADVERTISER OF THE MONTH

The **SMART Board™ Interactive Whiteboard** is the leading interactive technology on the market. With the unique touch screen technology, educators can create a powerful teaching environment which caters for the needs of the visual, auditory and kinaesthetic learners in your class.

Coupled with the Senteo response system, teachers can now gauge their student understanding of the concepts in the classroom. Each student is provided with their own remote to respond instantly to questions and increase one-on-one interaction. This allows teachers to assess, quiz and survey *all* students at once with ease and connect with even the quietest students, creating a positive learning environment for all.

To see these interactive technologies in action, contact an Education Consultant today on **1800 622 800**.
